COURSE DESCRIPTION

Despite many advances in diagnosis and treatment, cardiovascular disease remains the leading cause of death and disability in our country. Primary care physicians stand at the front line of patient care, with increasing demands to provide more specialized care. This virtual conference provides an update on the diagnosis and management of cardiovascular disease for primary care providers.

At the *23rd Annual Cardiology in Primary Care Virtual Conference*, you will hear from nationally renowned speakers on a wide variety of cardiology topics. Areas of focus will include congestive heart failure, coronary artery disease, peripheral arterial disease, electrocardiogram interpretation, arrhythmias and more. Conference will include didactic lectures, ECG reviews and panel discussions with the experts to highlight key concepts in cardiovascular disease.

This conference will be a recorded livestream. The recording will be available for a year post conference.

Core Competencies: Patient Care & Medical Knowledge

WHO SHOULD ATTEND

Family Practice, General Practice, Internal Medicine, Cardiology, Cardiovascular Physicians, Physician Assistants, Pharmacists, Nurse Practitioners and Nurses.
