WHO SHOULD ATTEND
Cardiologists, primary care physicians, hospitalists, infectious disease specialists, physician assistants, nurses and nurse practitioners and other health care providers interested in women’s heart care

STATEMENT OF NEED
Post-COVID symptoms are variable and due to the limited knowledge of long-term effects of COVID, we are continuously learning more about this post-infectious period. It is important that clinicians become aware of these post-COVID symptoms, one of which includes postural orthostatic tachycardia syndrome (POTS).

Several currently available risk calculators (Framingham risk score and the ACC/AHA risk assessment tool) often categorize asymptomatic premenopausal women as low to intermediate CV risk. However, the use of coronary artery calcium score can provide additional risk stratification beyond traditional risk factors.
OBJECTIVES
At the conclusion of this course, the participant should be able to:

- Identify the appropriate use of CAC scores for CV risk stratification in women
- Discuss the limitations of current CV risk assessment tools based on gender
- Review the current knowledge on the epidemiology, pathophysiology and clinical presentation of COVID-19
- Understand POTS as a post-COVID long-haul symptom
- Recognize the signs and symptoms of cardiac amyloidosis
- Understand the impact of social determinants on maternal mortality
- Identify the sex-specific risks and the impact on outcomes for women with cardiovascular disease

PROGRAM AGENDA

7:15-7:45 a.m. Pre-Conference: Meet the Sponsors/Exhibitors Presentations

7:45-7:50 a.m. Welcome/Announcements
Course Co-Director: Ijeoma Isiadinso, MD

7:50-8:35 a.m. Use of Coronary Artery Calcium Score for Cardiovascular Risk Stratification in Women
Jefferson Baer, MD

8:35-9:20 a.m. Cardiac Amyloidosis: Update on Diagnosis and Treatment
Kunal Bhatt, MD

9:20-9:40 a.m. Announcements/Break/Visit Exhibitors

9:40-10:25 a.m. POTS and Long-Haul COVID-19
Alexis Cutchins, MD

10:25-11:10 a.m. Mental Health Wellness in the Midst of a Global Pandemic: The Impact of COVID-19 on Clinical Providers and Patients
Sharon Horesh Bergquist, MD

11:10-11:30 a.m. Break/Visit Exhibitors

11:30 a.m.-12:30 p.m. Keynote: Sex-Specific Risks and Outcomes for Women with Cardiovascular Disease
Marjorie Jenkins, MD

12:30-1:15 p.m. Social Determinants of CVD in Women and the Impact on Maternal Mortality
Telisa Spikes, RN, PhD

1:15 p.m. Adjourn/Closing Remarks/CME Evaluation
Course Co-Director: Gina Lundberg, MD
Virtual Program via Zoom
Saturday, August 14, 2021
Click here to register: Emory Women’s Heart Conference

Special Online Reduced Price
Physician/Scientist - $40
Nurses, NP/PA, Other - $25
Residents/Fellows/Students - $25

Registration closes, Midnight, Thursday, August 12, 2021.
Conference Login Information will be sent out prior to event start date, August 14, 2021.
