Dear Sir or Madam:

Welcome to the 2026 Wellstar Cardiac Cerebrovascular Clinical Symposium: Bridging the Divide! This is our sixth symposium for Neurology and Cardiology. The Program Committee has worked hard to develop a curriculum encompassing relevant topics for your enjoyment.

Our one day format will have a moderated panel discussion followed by a case review and moderated commentary from our audience members. We hope this format will be exciting and informative.

Our five sessions will be:

- 1) Understanding the Complexities of Heart Disease in Women
- 2) Medical Intersection Between Cardiology and Neurology - Management and New Therapeutics
- 3) Syncope, Seizures, Spells, Oh My
- 4) Plugging the Appendage, Calming the Nerves, and Treating the Infection: A Multifaceted Approach
- 5) Optimizing Care Efficiency in the Neurovascular and Cardiovascular Space using Artificial Intelligence

Our goals for the Conference include:

- Provide a discussion on the management of challenging stroke patients secondary to a cardiac mechanism.
- Provide information that is relevant and practical to the care of our patients.
- Develop communication and relationships between our attendees and our industry partners.

ABOUT THE SYMPOSIUM

The Sixth Annual Wellstar “Cardiac Cerebrovascular Clinical Symposium: Bridging the Divide” meeting was designed to promote multi-disciplinary discussion surrounding pertinent clinical topics that involve both cardiovascular and neurologic disease. Our highly experienced panel will cover timely topics over a wide array of daily clinical conundrums. We anticipate a lively discussion surrounding case reviews that highlight the intersection of both specialties. Physicians, Advanced Practice Providers, nurses, technologists, and other team members who care for patients with cerebrovascular and cardiovascular disease are invited to attend.
